RFQ AP 63-19: Aviation Engineering Design, Bidding, and Construction Phase Services for Terminal Expansions at the Destin-Fort Walton Beach Airport

PART 1 – GENERAL INFORMATION

The purpose of this Request for Qualifications is to provide interested consultants with guidelines and information to enhance their RFQ submission for the requested scope of services.

The Okaloosa County Board of County Commissioners is soliciting Statements of Qualifications from interested firms detailing past performance, technical, and personnel qualifications to increase the footprint of the terminal facility at the Destin – Ft Walton Beach Airport (VPS). Specifically the project will expand the lobby and ticketing areas to increase passenger capacity and integrate seamlessly into the baggage handling system (BHS) project currently in design.

Okaloosa County plans to retain professional architect/engineer (A/E) services to perform design of the ticketing and lobby expansion to enhance the throughput capacity and efficiency of passenger check-in and circulation. The design will include expansion of the facility and/or modifications of existing space to provide approximately 8,000 square feet of public circulation space, restroom facilities, airline ticket counters, MEP, flooring, entry and exit corridors, connecting sidewalks, overhangs, parking lot revisions, security cameras, access control, exterior lighting and access gates. In 2018, the Airport selected a consultant to design and provide bid phase services for expanding the facility to increase BHS capacity and efficiency. The BHS project will be a major construction effort that will neighbor space for the ticketing and lobby expansion already identified in conceptual layouts. A conceptual floor plan of the ticketing and lobby space has been produced in order to provide the proper amount of circulation space and restroom facilities to meet needs identified in the 2018 Terminal Area Study for this portion of the airport. Due to the physical proximity of the project limits, shared utilities, and structural components of the project, design will require heavy coordination with the existing BHS project design consultant and development of a bid package and permitting to construct both design scopes as one construction project. This will take advantage of on-going design efforts to avoid duplication of utility systems while maximizing economies of scale during construction.

Selection and negotiations will conform to the Florida Consultants Competitive Negotiation Act (CCNA) Chapter 287.055, Florida Statutes and County policy. The proposed draft agreement for the work contemplated by this RFQ is attached and will be utilized.

TERM

The term of this contract will be for up to two (2) years. The consultant must submit 90% design plans for the lobby and ticketing expansion to the County within 90 days of a notice to proceed. Fully complete 100% design plans and specifications must be submitted and approved within 120 days. The term of the contract will coincide with the construction contract and terminate 90 days after final project completion.

PART 2 – SCOPE OF SERVICES

The scope of professional services includes, but may not be limited to, the following:

1. Develop a design, 100% probable construction cost estimate, and construction bid documents for the expansion of the lobby and ticketing portion of the overall project. The design should include airline ticket counter build-out, ticket counter que space, public circulation, restroom facilities, and entrance/exit from the exterior along with tie-in to parking lot reconfigurations, striping, curbing, fencing, access control, covered walkway overhangs, landscaping, exterior lighting, signage and all other relevant terminal facility construction aspects in terminal interior and exterior renovations and expansion projects. System expansion should integrate seamlessly into the existing facility and baggage handling system project design/spaces adjoining the ticketing and lobby expansion space. The building envelope and mechanical, electrical, plumbing, and fire suppression aspects of the design will rely heavily on groundwork and existing design efforts already being incorporated into the BHS expansion project.
2. Develop bid documents including final design documents and bid schedule to include front-end documents, technical specifications and bid set of final plans. The selected consultant will be responsible for assisting in the consolidation of design plans, technical specs and other information from the BHS project and work with BHS engineers to provide all documents to form one combined project manual for a single construction project executed under one general contractor. Bid services should include analysis and comparison of the bids and line item pricing received for all elements of the subject scope of work in order to provide detailed information in the formation of a combined engineer's recommendation of the most responsible and responsive low bidder. Permitting services will also be included to ensure that the project is fully coordinated and approved to proceed to construction.
3. Coordination with various entities including the BHS expansion project design consultant, the Airport, other County Departments for permitting, Eglin AFB/privatized utility contractors, FDEP, NFWFMD, TSA, the FAA and FDOT during the design, bid, and construction phases.
4. Grant services to include but not limited to the preparation of FDOT and FAA quarterly construction updates, supporting documentation for grant reimbursements, tracking of project funds for various portions of the project that meet different eligibility requirements for FAA AIP and PFC program funds, and development/consolidation of project close-out documents.
5. Construction phase services will include contract administration, construction inspection/resident project representative services, review and recommendation of approval for contractor invoices, submittal review and approval, clarification of RFIs and change order request review/management, and facilitation of project progress meetings and minutes among other desired and negotiated services.

PART 3 – RFQ SUBMITTAL REQUIREMENTS AND PROCEDURES

The original unbound copy of the response to the Requests for Qualifications (Proposal) and all supporting documentation is required and must be signed by a company official with the power to bind the company in its contract. All Proposals must be completely responsive to the Request for Qualifications guidelines for consideration.

All Proposals received will be reviewed by the County's Procurement Selection Committee. Proposals should be responsive to the items identified in this RFQ and contain no more than 10 pages. One piece of paper printed front and back is considered two pages. The 10-page maximum excludes the cover, table of contents, section dividers, and copies of required forms. In addition to the paper original, an electronic copy of the signed Proposal including all required forms shall be submitted on thumb drive as an unencrypted, single-file, pdf document.

The Committee will review the qualification proposals received unless determined to be non-responsive or non-responsible. The Committee will rank each proposal based on the scoring criteria provided below which demonstrate firm's airport-specific experience, capabilities, ability, and adequacy of personnel, past record, recent experience, current workload, DBE qualifications and the overall adherence to the Request for Qualifications.

In the event of a tie, the tie will be broken by the firm with the higher ranking as ranked by the Airports Department Procurement Selection Committee representative. If a tie still remains, then the tie will be broken by the firm with the higher ranking as ranked by the department representative of the Procurement Selection Committee in the following order: Public Works, Water & Sewer, TDC, and Corrections. Should a tie still remain after considering the scores in the order herein described, the Purchasing Manager will review the tied proposals and break the tie. At the sole discretion of the Purchasing Selection Committee, oral presentations may be requested and used in lieu of or in addition to the tie-break procedure described. If the Selection Committee decides to hold oral presentations they will re-score the firms presenting and follow the procedure listed above.

The final top ranked firm will be recommended to the Board of County Commissioners (County) for approval. The County will award the contract to the most qualified respondent, and the County reserves the right to award the contract to the respondent submitting the most responsive submittal with a negotiated agreement which is most advantageous and in the best interest of the County, and to reject any and all qualifications or to waive any irregularity or technicality in qualifications received. Okaloosa County shall be the sole judge of the qualifications and the resulting negotiated agreement that is in its best interest and its decision shall be final. Should contract negotiations fail or should concurrence not be received from the BCC, concurrence and negotiations will fall to the next highest ranked respondent.

At such time when an approval is granted by the Okaloosa County Board of Commissioners, notification will be provided to each firm in accordance with the County's Purchasing Department policy.

Response to the RFQ should include the following:

1. A **letter of interest** should be prepared by a corporate officer or principal of the firm authorized to obligate the firm contractually. The project requires an understanding of the project design, phasing that will be required during execution, and site requirements to include integration of all applicable state and federal codes, regulations, policies, and procedures. Design strategy/process should address data collection for project development, owner coordination, user input, and a proposed design schedule. The consultant should

also describe their familiarity and understanding of the most recent VPS terminal area study and terminal layout plan as it relates to the BHS, ticketing/check-in, and public circulation space needs at the airport.
