### OKALOOSA COUNTY SALTWATER BEACH MONITORING RESULTS for July 29, 2013

The Florida Department of Health in Okaloosa County conducts weekly saltwater beach water quality monitoring at 13 sites through the Healthy Beaches Monitoring Program. The water samples are analyzed for enteric bacteria (enterococci) that normally inhabit the intestinal tract of humans and animals and which may cause human disease, infections, or rashes. The presence of enteric bacteria is an indication of fecal pollution, which may come from stormwater runoff, pets and wildlife, and human sewage.

Site	Name	City	Enterococci	Water Quality
SP-1	<a href="#">Liza Jackson Park</a>	Ft. Walton Beach	Fail	Poor
SP-2	<a href="#">Garniers Park</a>	Ft. Walton Beach	Fail	Poor
SP-3	<a href="#">Marler Park</a>	Okaloosa Island	Pass	Good
SP-4	<a href="#">Wayside Park</a>	Okaloosa Island	Pass	Moderate
SP-5	<a href="#">Poquito Park</a>	Shalimar	Pass	Moderate
SP-6	<a href="#">Gulf Islands National Seashore</a>	Okaloosa Island	Pass	Moderate
SP-7	<a href="#">East Pass</a>	Okaloosa Island	Pass	Moderate
SP-8	<a href="#">Lincoln Park</a>	Valparaiso	Pass	Moderate
SP-9	<a href="#">Henderson Beach</a>	Destin	Pass	Good
SP-10	<a href="#">Fred Gannon Rocky Bayou State Park</a>	Niceville	Pass	Moderate
SP-11	<a href="#">James Lee Park</a>	Destin	Pass	Good
SP-13	<a href="#">Emerald Promenade</a>	Okaloosa Island	Fail	Poor
SP-14	<a href="#">Clement E Taylor Park</a>	Destin	Fail	Poor

Water quality classifications are based upon the United States Environmental Protection Agency's (EPA's) recommended standard for enterococci of greater than or equal to 104 colony forming units per 100 milliliters of marine water.

Advisories have been issued for **Liza Jackson Park and Garniers Park** of Fort Walton Beach; **Emerald Promenade** of Okaloosa Island; and **Clement Taylor Park** of Destin based on the enterococci standards recommended by the EPA. This should be considered a potential health risk to the bathing public.
