

**FOR IMMEDIATE RELEASE**

*Okaloosa County Board of County Commissioners*

**Niceville** - Okaloosa County Emergency Management and the National Weather service station in Mobile have begun to monitor a weak low-pressure system in the eastern Gulf of Mexico. This system appears to be moving toward the north central Gulf and may arrive in our area as early as Tuesday. We may experience affects through the middle of the week. In addition, the Okaloosa County Division of Emergency Management has issued a warning for moderate rip current in Gulf waters through Thursday. The Division will stay in direct communication with the National Weather Service in Mobile and update the media and public as is appropriate. For more information, please contact the Public Information office at 585-7059 or via email at [csaul@myokaloosa.com](mailto:csaul@myokaloosa.com)
